

MindBox Turbo-Charges Loan Origination Capabilities for Paul Financial

*ARTOptimize, Power Portal and Power Editor Combine
to Deliver Automatic Deal Structuring at Loan Origination Portal*

Greenbrae, Calif., September 5, 2006 –MindBox®, a leader in information solutions for automating complex business and decision processes, today announced that Paul Financial LLC, a San Rafael, Calif.-based mortgage lender, is turbo-charging its loan origination system with MindBox's Power Portal, Power Editor and ARTOptimize™ technology. Paul Financial deployed MindBox's decisioning products to enable mortgage loan decisioning and deal structuring capabilities via a web portal – including the ability to manage and easily maintain loan pricing and underwriting guideline changes.

Paul Financial deployed ARTOptimize™, a decisioning engine from MindBox that automates the process of deal structuring -- creating individually tailored financial packages for unique borrower conditions. To smooth the process even more, Paul Financial has implemented MindBox Power Portal, a customizable web site technology for e-commerce transactions, to develop its own private-branded web site through which loan officers and brokers can upload 1003 files, access credit reports and receive instant underwriting decisions that include price, conditions and explanations of all eligible products.

In addition, Paul Financial purchased MindBox Power Editor, which is a user-friendly application for modifying rules and policies so that the lender can edit and maintain its rules without the need for IT staff. Power Editor ensures that Paul Financial's loan decisions are always responsive to the most current market information and conditions.

"MindBox has delivered the technology we sought to dramatically improve customer service," said Tamara Blake, CIO for Paul Financial. "The combination of a centralized web portal with up-to-date pricing data and automated processes gives our brokers and loan agents the tools they need to originate a higher volume of loans while at the same time leveraging the best combination of loan products that we have to offer at any given time."

"Not only do MindBox's products improve performance of Paul Financial's existing loan origination system by providing instantaneous decisioning capabilities, but the portal also

allows brokers to provide product, pricing and deal structuring online at the point of contact," said Rich Barfus, president and CEO of MindBox. "With MindBox's integrated offering, Paul Financial brokers have the information they need to quickly and accurately provide customers with the best loan offers available."

About MindBox

MindBox®, an MDA company, is an information solutions company focused on financial services organizations. MindBox provides solutions that leverage company and industry best practices in order to automate common lending practices such as underwriting, pricing, product best fit, deal structuring, debt reparation and cross sell across multiple origination channels. The company's products and services have a proven track record of reducing cost and increasing revenue by automating knowledge-intensive business processes using sophisticated decisioning systems and award-winning rule and case-based reasoning software.

MindBox technology integrates internet interfaces and other client contact channels with back-end business operations into one streamlined, efficient system that provides individually-tailored, optimized customer interactions. More information can be found by visiting www.mindbox.com or by calling (877) 650-MIND (6463).
