

## **MindBox Announces ART*Enterprise* 10 on Linux**

*Financial Services Inferencing Software Adds Linux Support and Secure Sockets*

**Greenbrae, CA, June 16, 2003** – MindBox, LLC, the leading provider of software to automate complex business decisions, today announced Linux platform support and a secure sockets upgrade as part of ART*Enterprise*™ 10, the latest version of its flagship inferencing engine for the financial services industry.

MindBox's ART*Enterprise* product suite is used by leading financial institutions – including Ford Motor Credit, Ocwen and Upland Mortgage – to automate the decision making process and to standardize the application of policies throughout the institution. The addition of Linux OS support was in response to customer requests, and allows MindBox to sell ART*Enterprise* to a rapidly growing segment of the IT market. ART*Enterprise* for Linux runs on Red Hat 9, using GCC 3.2.2.

The secure sockets enhancement enables communication of encrypted data transfer into and out of any application running on top of ART*Enterprise*, enabling the system to work in all HTTPS environments.

“Our very active User Group has been instrumental in helping to guide the direction of our software development,” explains Dr. Brian Sauk, vice president of development at MindBox. “The enhancements in version 10 reflect that feedback, as well our commitment to addressing customers’ needs with the continued development of our products.”

These updates to ART*Enterprise* are available to all existing customers worldwide that subscribe to MindBox’s annual maintenance service.

### **About MindBox, LLC**

Based in Greenbrae, Calif., MindBox, LLC is a technology company that helps financial services institutions automate their complex decision processes such as loan underwriting, loan product selection, cross-selling opportunities and feature-based pricing. The ART*Enterprise* Product Family is an industry-proven software system that emulates human judgment by using rules and a patented case-based reasoning engine to automate the decision-making process.

MindBox also offers consulting solutions for the financial services industry and ships a complete suite of applications including ART*Optimize*, ART*Qualify*, ART*Price*, The MindBox Power Editor and Debt Consolidation Advisor. All MindBox products work online and offline to optimize every customer interaction across multiple channels.
