StoneWater Selects MindBox Technology to Deliver Instant On-Line Product and Pricing Decisions

Proven technology, speed of implementation key advantage for new mortgage lender

Los Angeles, Calif., July 23, 2008 MDA MindBox, Inc. (MindBox®), a leader in information solutions for automating complex business and decision processes, announces that StoneWater Mortgage, a new, national wholesale mortgage lender, has selected MindBox's ART *Optimize*[™] and Power Editor[™] applications to manage its loan product and pricing processes. Integration of the MindBox applications into StoneWater's broker portal, called H2O Online, allows brokers to apply for mortgages on-line and receive loan approval decisions, qualifying conditions, 'best-fit' alternative loan suggestions instantly and automatically.

"We are especially gratified that StoneWater chose to work with us," says Bill Richer, General Manager of MDA MindBox. "Their business model mandates a flexible, rules-driven system that will instantly respond to market conditions and competitive situations. StoneWater had stringent cost and timeline concerns and our proven technologies and the strength of our resources allowed us to complete the implementation in record time."

"We did significant research in identifying the right partners to integrate into our new platform and MindBox was a true standout," said Karl F.W. Young, president of StoneWater. "We quickly became very comfortable with the MindBox team and were excited to have the opportunity to work with a vendor that has played such a dominant role in developing some of the industry's leading applications."

StoneWater is also using the MindBox Power Editor to manage corporate-wide underwriting rules and pricing policies "The Power Editor component gives StoneWater the ability to enter and maintain lending policies," explains Richer. "Business users can change the actual rules in the system without support from their IT department."

About MDA MindBox, Inc.

MindBox® is an information solutions company focused on financial services organizations. MindBox provides solutions that leverage company and industry best practices in order to automate common lending practices such as underwriting, pricing, product best fit, deal structuring, debt reparation, and cross selling across multiple origination channels. The company's products and services have a proven track record of reducing cost and increasing revenue by automating knowledge-intensive business processes using sophisticated decisioning systems and award-winning rule and case-based reasoning software.

MindBox technology integrates internet interfaces and other client contact channels with back-end business operations into one streamlined, efficient system that provides individually-tailored, optimized customer interactions. More information can be found by visiting www.mindbox.com or by calling (877) 650-MIND (6463).
