

**FOR IMMEDIATE RELEASE**

## **MindBox Announces State of the Art Java Integration**

**Greenbrae, CA, April 29, 2002**– MindBox™, Inc., the worldwide leader in providing intelligent technology to automate complex business and decision processes, today announced the general availability of improved Java integration for their *ARTEnterprise* Product Family. MindBox technology now integrates seamlessly with even the most pure Java environments, without any loss of performance.

MindBox's new and improved Java integration is implemented according to the J2EE Connector Architecture standard. This enables *ARTEnterprise* to be used in a J2EE environment. MindBox's Java interoperability approach also supports JMS, EJB, and Java Beans implementations.

"Our research indicates that IT groups are deploying increasingly complex applications on the J2EE platform as it matures and broadens its core infrastructure services," stated Thomas Murphy, program director, with META Group's Application Delivery Strategies. "This is driving a need for robust libraries of business components that will speed time to market and integrate business knowledge."

By adding intelligence and efficiency to clients' critical business process, MindBox greatly simplifies the task of providing faster, more individualized service throughout the enterprise. The *ARTEnterprise* Product Family enables lenders to automate their end-to-end lending process – from product selection, to pricing, to final loan package structuring and negotiation. The software's modular, object oriented architecture provides unmatched flexibility to easily modify policies as needed according to business needs and market requirements.

"By adhering to the Java Connector standard, we are able to seamlessly integrate our technology in a Java environment without sacrificing performance or scalability," says Rich Barfus, CEO and President of MindBox, Inc. "With ongoing enhancements like this, we will continue to allow our new and existing customers to leverage their investment in MindBox now and into the future."

### **About MindBox, Inc.**
